

# BANK OF MAHARASHTRA GENERALIST OFFICER SCALE II MODEL TEST PAPER 2019-20

## ENGLISH LANGUAGE

### Read the following passage and answer the questions given below:

The provisions of the new Higher Education Commission of India (HECI) Bill drafted by the Centre have far-reaching implications for the expansion and quality of human resource development, at a time when access to skill-building and educational opportunity are vitally important. There were 864 recognised universities and 40,026 colleges in the country in 2016-17, while the gross enrolment ratio of students was only about 26%. To put this in perspective, there were only 20 universities and 500 colleges at the time of Independence. Previous attempts at system reform involving expert committees and even legislation to create a new body for higher education and research had **advocated** changes, with an emphasis on promoting autonomy, access, inclusion and opportunity for all. That challenging goal will fall to the HECI, the proposed successor body to the University Grants Commission. For this very reason, the Centre should give sufficient time to academia, the teaching community and society at large to submit considered opinions on the draft proposals. Among the key questions that need resolution is the future role of multiple regulatory bodies that currently exist for engineering, medicine and law; the Yash Pal Committee had recommended that they should be brought under the ambit of a single commission. There is a case to include other professional education streams as well, including architecture and nursing. The aim should be to set academic benchmarks for each stream, with sufficient autonomy to **innovate** on courses and encourage studies across disciplines.

Among the more **contentious** issues arising out of the draft Bill is the Centre's decision to shift grant-giving powers for higher education institutions to the Ministry of Human Resource Development or a separate body. The UGC has been doing this so far, covering a variety of functions, and whatever the flaws, it ensured a separation of funding decisions from political considerations. Maintaining a balance on allocation of funds and ensuring transparency will now depend on the proposed advisory council to the HECI. It is welcome that the States are represented on the advisory council, giving it a federal character, although it is the Centre that will have the final say in all matters, not even the apex HECI. At a broader level, higher education is challenged today by fast-paced technological changes affecting the economy and the need to create a workforce that has the requisite skills. Reform should, therefore, lead to the creation of an agency that has the **intellectual** corpus to help universities and colleges adapt, and the vision to plan for public funding in the emerging spheres of activity. There is a positive attempt in the draft legislation to weed out degree mills and dubious training institutions, with a provision for prosecution and imprisonment of management officials who defy the HECI. Yet, this will take political will, given that over the past three decades laissez faire expansion of higher education has been pursued purely for commercial motives.

1. Which of the following is not true according to the passage?
  - a) That challenging goal will rise to the HECI, the proposed successor body to the University Grants Commission.

Sales of George Orwell's \_\_\_\_\_ (26) novel Nineteen Eighty-Four have spiked twice recently, both times in response to political events. In early 2017, the idea of 'alternative facts' called to mind Winston Smith, the book's protagonist and, as a clerk in the Ministry of Truth, a professional alternator of facts. And in 2013, the US National Security Agency whistleblower Edward Snowden \_\_\_\_\_ (27) widespread government surveillance explicitly to what Orwell had imagined: 'The types of collection in the book – microphones and video cameras, TVs that \_\_\_\_\_ (28) us – are nothing compared to what we have available today.'

Snowden was right. Re-reading Nineteen Eighty-Four in 2018, one is struck by the 'TVs that watch us', which Orwell called telescreens. The telescreen is one of the first objects we \_\_\_\_\_ (29): 'The instrument (the telescreen, it was called) could be dimmed, but there was no way of \_\_\_\_\_ (30) completely.' It is omnipresent, in every private room and public space, right up until the end of the book, when it is 'still pouring forth its tale of prisoners and booty and slaughter' even after Smith has resigned himself to its rule.

**Directions:** In the following questions, select the set of conclusion which logically follows from the given statements.

**49. Statements I: All foxes are plates.**

II All plates are trees.

Conclusions I All foxes are trees.

- (b) Only conclusions I, III, and IV follow.
- (c) Only conclusions II, III, and IV follow.
- (d) Only conclusions I and IV follow.
- (e) None of the above.

**Solution: (b)** When all foxes are plates and all plates are trees, then naturally all foxes will be trees and some trees will then have to be foxes. And when all plates are trees then some trees will have to be plates. Therefore, only conclusions I, III and IV are correct.

**50. Statements**

I: Some cubes are squares.

II: All squares are circles.

**Conclusions** I: All cubes are circles.

(b) Only conclusion I, II and III follow.

(c) All conclusions are correct.

(d) Only conclusions II and III follow.

(e) None of the above.

**Solution: (d)** When it is given that some cubes are squares and all squares are circles, then some cubes will naturally be circles, though all cubes cannot be circles. When some cubes are circles, then some circles will have to be cubes. And when all squares are circles, then circles will have to be squares. As per given statement II, all squares are circles. Therefore all squares cannot be cubes. As such only conclusions II and III are correct.

**Directions:** In each question below is given a statement followed by three assumptions number I, II and III. An assumption is something supposed or taken for granted. You have to consider the statement along with the assumptions and decide which of the assumptions is implicit in the statement. Then decide which of the alternatives is the correct answer.

**56. Statement:**

"Use Riya Cold Cream for fair complexion"- an advertisement.

**Assumptions:**

I. People like to use cream for fair complexion.

II. People are easily fooled.

III. People respond to advertisements.

(a) Only I is implicit.

(b) Only II is implicit.

(c) Only I and III are implicit.

(d) Only I and II are implicit.

(e) All are implicit.

**Solution: (c)** The advertisement itself denotes that people like to use cream for fair complexion and they do respond to advertisements. Advertisements are for awareness of the product not for fooling people.

**57. Statement:**

"Slogans against smoking in office should be put on the notice board"-an employee in an office suggests.

**Assumptions:**

I. The employee felt that his suggestion will be considered.

II. People smoke in the office.

III. Some people will stop smoking after reading the slogans.

(a) Only I is implicit.

(b) Only I and II are implicit.

(c) Only II and III are implicit.

(d) None is implicit.

(e) All are implicit.

**Solution: (e)** Suggestion for putting up the notice is made because some people must be smoking in office. Notice board is read by people in office and some may stop smoking after reading the slogans.

**Directions (58-62):** Each of the questions below consists of a question and two statements numbered I and II given below it. You have to decide whether the data provided in the statements are sufficient to answer the questions. Read both the statements and give your answer.

(A) if the data in Statement I alone are sufficient to answer the question, while the data in Statement II alone are not sufficient to answer the question.

(B) if the data in Statement II alone are sufficient to answer the question, while the data in Statement I alone are not sufficient to answer the question.

(C) if the data either in Statement I alone or in Statement II alone are sufficient to answer the question.

(D) if the data given in both Statements I and II together are necessary to answer the question.

(E) If data in both Statements I and II is not sufficient to answer the question.

**58. Which direction is Shashidhar facing?**

- I. In the early morning Shashidhar was standing with a puppet and the shadow of the puppet was falling to the right of Shashidhar.
- II. In the early morning Shashidhar was standing on the ground. His shadow was falling behind him when he turned to his left.

**Ans. C**

By Statement (I), we know that the shadow of the puppet is formed in the west during morning, the right side of Shashidhar will be West, and thus he is facing South. While Statement (II) suggests that the left side of Shashidhar lies East, so he is facing the South. Hence, Statements (I) or (II) alone is sufficient to answer the question.

**59. Who among A, B, C, D and E teaches History?**

- I. Each one of them teaches only one subject. B teaches Mathematics, while E teaches Science. A or C does not teach Geography. A or D does not teach English.
- II. C and E are teachers of English and Science respectively and A is the teacher of Mathematics.

**Ans. A**

Data of Statement I may be tabulated as shown below:

Name	Subject
A	History
B	Mathematics
C	English
D	Geography
E	Science

Thus, it is clear that A teaches History. Data of Statement II may be tabulated as shown below.

Name	Subject
A	Mathematics
B	
C	English
D	
E	Science

It is not possible from here to decide who teaches History. Hence, Statement I above is sufficient to answer the question.

**60. In a row of boys facing South who is at immediate left to Ramakant?**

- I. Suresh is at immediate right to Chandrakant, who is fourth to the right of Ramakant.
- II. Suresh is third to the right of Ramakant and Naresh is second to the right of Suresh.

Ans e

Using statement I:

By using the given information, we cannot determine who is at immediate left to Ramakant.

Using statement II:

By using the given information, we cannot determine who is at immediate left to Ramakant.

**61. Who has secured the maximum marks among six friends A, B, C, D, E and F?**

- I. B secured less marks than A and F but not less than C, D and E
- II. F secured more marks than B but not as much as A.

Ans. D

Let ' $>$ ' denote 'secured more marks'. By Statement (I),  $A, F > B > C, D, E$ ; and by statement (II), we have  $A > F > B$ ; therefore, from (i) and (ii)  $A > F > B > C, D, E$ . Hence, both the statements are together sufficient to answer the question.

**62. What will be the position of hour hand of a clock at 7:30 pm?**

- I. There are English alphabets on the dial of the clock instead of digits.
- II. The hour hand is at P at 7 O'clock.

Ans. E

From both the statements, it follows that hour hand will be after P at 7:30 pm.

**Directions: Daya, Kamini and Shilpa are standing at the corners of an equilateral triangle piece of plot as shown below in Fig.**

- (b) Daya is to the South-west of Shilpa
- (c) Daya is to the South-east of Kamini
- (d) Daya is to the South-west of Kamini
- (e) Daya is to the West of Shilpa

**Solution: (d)** From the given fig., it is clear that Daya is to the South-west of Kamini.

64. From the positions mentioned in Question, if all of them run in the anticlockwise direction covering two side and then stop. Which one of the following statement is true?

- (a) Daya is to the South of Shilpa
- (b) Kamini is to the South-west of Shilpa
- (c) Daya is to the south of Kamini
- (d) Daya is to the East of Shilpa
- (e) Daya is to the South-east of Shilpa

**Solution: (b)** From the given Fig., it is clear that Kamini is to the South-west of Shilpa.

65. In a row of 40 girls, when Kamal was shifted to her left by 4 places her number from the left end of the row became 10. What was the number of Sujata from the right end of the row if Sujata was three places to the right of Kamal's original position?

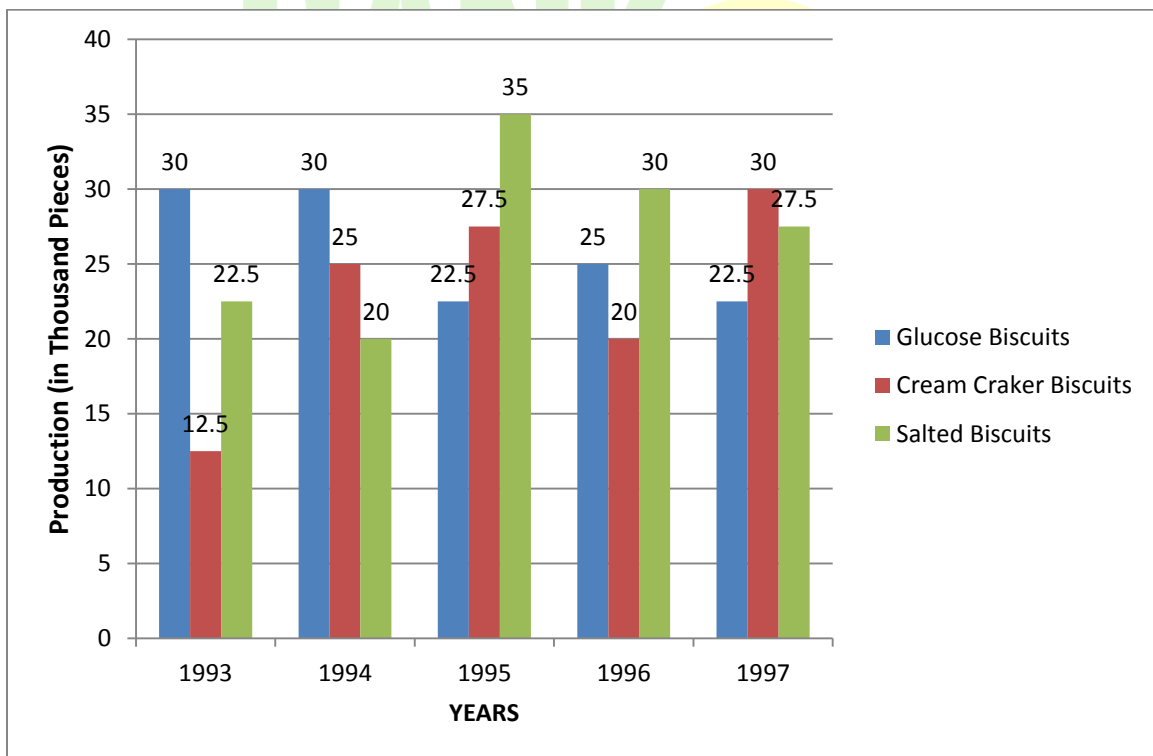

- (a) 22
- (b) 26
- (c) 25
- (d) 23
- (e) None of these

**Answer: (d)** Kamal when shifted to her left by 4 places she becomes 10th from the left. It means she was 15th from the left originally. 3 places to the right of kamal's original position means 18<sup>th</sup> from the left.

Number of Sujata from the right end =  $40 - 18 + 1 = 23$

**Directions:** Each of the questions below consists of a question based on an adjacent figure, and two statements numbered I and II given below it. You have to decide whether the data provided in the statements are sufficient to answer the question. Read both the statements and give your answer.

1. If the data in Statement I alone are sufficient to answer the question, while the data in Statement II alone are not sufficient to answer the question.
2. If the data in Statement II alone are sufficient to answer the question, while the data in Statement I alone are not sufficient to answer the question.
3. If the data either in Statement I alone or in Statement II alone are sufficient to answer the question, and
4. If the data in both the Statements I and II together are necessary to answer the question.
5. If data in both Statements I and II is not sufficient to answer the question.

**Q: 86.** In the given figure, what is the diameter of circle?

- I. The area of the largest section of the circle is  $33\pi$ .
- II. The length of the arc on the unshaded portion of the circle is  $\pi$ .

Solution: 3)

Unshaded sector is  $\frac{1}{12}$ th of the circle. So, by Statement I, we have the area of the shaded portion,  $\pi r^2 = 33\pi$ . Thus, dividing by  $11\pi$  and multiplying by 12, we have  $r^2 = 36$ . Hence,  $r = 6$  and diameter will be 12.  
From Statement II, we have the length of the arc. It must be  $\frac{1}{12}$ th of the circumference of the circle. That is,  $\pi = \frac{1}{12}(2\pi r)$ . Now, multiplying by 12 and dividing by  $2\pi$ , we have,  $r = 6$  and the diameter will be 12.

**Q: 87. In the given figure, what is the value of  $(c+d)$ ?**

- I.  $b+f = 80^\circ$
- II.  $a+b = 110^\circ$

**Solution: 2)**

Using Statement II, we know that the sum of angles in any triangle is  $180^\circ$ . Let the measure of angle ABC be  $m$ , using the property of vertical angles, being equal, we have the upper triangle  $a+b+m = 180^\circ$  or  $110^\circ+m = 180^\circ$ , or  $m = 70^\circ$ . Similarly, looking for  $\triangle ABC$ , we know that  $c+d+70^\circ=180^\circ$ , and  $c+d = 110^\circ$ . However, Statement I gives us what  $(b+f)$  is, but the individual values could be almost anything, and it tells us very little about other angles.

**Q: 88. What is the perimeter of BCDE in the given figure?**

- I. The perimeter of rectangle ABCD is 18.
- II. The area of rectangle ABCD is 18.

**Solution: 3)**

Using Statement II alone, we know that the area of ABCD is 18, and one side is 3. Thus, the other side must be 6, and we conclude that the perimeter is  $(11+10+3+6) = 30$ . By Statement I, we know that the rectangle ABCD has a perimeter of 18 with one side 3, the other must be 6. Thus,  $BC = AD = 6$ , and  $\triangle AED$  is  $(6+8+10)$  a right angle triangle. Now,  $BE = 11$ ,  $ED = 10$ , and  $DC = 3$  and  $BC = 6$ . The perimeter is  $(11+10+3+6) = 30$ .

Q: 89. What is the radius of the circle with centre O in the given figure?

- I. The area of the shaded region is  $8\pi$ .  
 II. The circumference of one of the smaller circles is  $4\pi$ .

**Solution: 3)**

Using Statement II alone, and the fact that the circumference of a circle is  $2\pi r$ , with the same notation,  $\pi$  we have  $2\pi\left(\frac{1}{2}r\right) = 4\pi$ . Thus,  $r = 4$ . Using Statement I alone, denoting the radius of the larger circle  $r$ , each of the smaller circles has radius  $\frac{1}{2}r$ . Since, the area of a circle is  $\pi r^2 - 2\left(\pi\left[\frac{1}{2}r\right]^2\right) = \left(\pi r^2 - \frac{1}{2}r^2\right)$  this must be equal to  $8\pi$ . Thus,  $\frac{1}{2}\pi r^2 = 8\pi$ , which means that  $r^2 = 16$  and  $r = 4$ .

5. In the given figure, is angle ABC a right angle?

- I.  $I_1$  is parallel to  $I_2$ .  
 II.  $x = 53^\circ$ .

**Solution: 4)**

Since, the corresponding angles formed when two parallel lines are crossed by a transversal are equal, Statement I tells us that angle  $DCE = 37^\circ$ , and thus by equality of vertical angles, angle  $ACB = 37^\circ$ , but we do not know angle  $CAB$ , and we can conclude nothing about  $ABC$ . Similarly, from Statement II we know only one angle in  $\Delta ABC$ . But by combining statement I and II, we know that the two angles total to  $90^\circ$ . Hence, the remaining angle  $ABC$  is also  $90^\circ$ .

Q: 90. Six playing cards are lying face down on a table, where two of them are kings. Two cards are drawn at random. Let  $a$  denote the probability that at least one of the cards drawn is king, and  $b$  denotes the probability of not drawing a king. The ratio  $a/b$  is:

1.  $\geq 0.25$  and  $< 0.5$
2.  $\geq 0.5$  and  $< 0.75$
3.  $\geq 0.75$  and  $< 1.0$
4.  $\geq 1.0$  and  $< 1.25$

5.  $\geq 1.25$

**Solution: 5)**

There are three scenarios.

Either two are kings, only one card is king, none of the two is king.

In all, the number of combinations of taking 2 cards out of 6 =  ${}^6C_2$

$$\frac{6!}{4!2!} = \frac{6 \times 5 \times 4!}{4! \times 2 \times 1} = 15$$

Split of this is like this:

The number of combinations of the two cards being kings =  ${}^2C_2 = 1$

The number of combinations of only one card being a king =  ${}^2C_1 \times {}^4C_1 = 2 \times 4 = 8$

The number of combinations of neither cards being a king =  ${}^4C_2 = 6$

Now,  $a = P(\text{at least one king}) - P(\text{one king}) + P(\text{two king})$

$$= (8 + 1) \frac{1}{5} = \frac{3}{5}$$

$$b = P(\text{no king}) = \frac{6}{15} = \frac{2}{5}$$

$$\Rightarrow \frac{a}{b} = \frac{3}{2} = 1.5$$

**Q: 91.** You enter a chess tournament where your probability of winning a game is 0.3 against half the players (call them Type 1), 0.4 against a quarter of the players (call them Type 2) and 0.5 against the remaining quarter of the players (call them Type 3), You play a game against a randomly chosen opponent. What is the probability of winning the tournament?

1. 0.365
2. 0.452
3. 0.375
4. 0.236
5. None of the above

**Solution: 3)**

Let  $A_i$  be the event of playing with an opponent of type

$$P(A_1) = 0.5, P(A_2) = 0.25, P(A_3) = 0.25,$$

Let B be the event of winning

$$P\left(\frac{B}{A_1}\right) = 0.3, P\left(\frac{B}{A_2}\right) = 0.4, P\left(\frac{B}{A_3}\right) = 0.5,$$

Thus by total probability theorem, probability of winning is:

$$P(B) = 0.5 \times 0.3 + 0.25 \times 0.4 + 0.25 \times 0.5 = 0.375$$

**Q: 92.** Ashish studies late in the night and is hungry. He opens his mother's snack cupboard without switching on the lights, knowing that his mother has kept 10 packets of chips and biscuits in the cupboard. He pulls out 3 packets from the cupboard and all of them turn out to be chips. What is the probability that the snack cupboard contains 1 packet of biscuits and 9 packets of chips?

1. 6/55
2. 12/73
3. 14/55
4. 7/50
5. None of the above

**Solution: 3)**

There are at least three Packets of Chips in the Cup Board.

∴ Total 10 Packets in all.

∴ {Number of packets of Chips, Number of packets of Biscuits}

{(3, 7) or (4, 6) or (5, 5) or (6, 4) or (7, 3) or (8, 2) or (9, 1) or (10, 0)}

The number of ways in which three packets of Chips can be drawn

$$= {}^3C_3 + {}^4C_3 + {}^5C_3 + {}^6C_3 + {}^7C_3 + {}^8C_3 + {}^9C_3 + {}^{10}C_3$$

$$= 330$$

The number of ways in which three packets of biscuit can be drawn when there are 9 packets of Chips

$$= {}^9C_3 = \frac{9!}{3!(9-3)!} = \frac{9!}{3!6!}$$

$$= \frac{9 \times 8 \times 7 \times 6!}{3 \times 2 \times 6!} = 84$$

$$\therefore \text{Required Probability} = \frac{84}{330} = \frac{14}{55}$$

**Q: 93.** The answer sheets of 5 engineering students can be checked by any one of 9 professors. What is the probability that all the 5 answer sheets are checked by exactly 2 professors?

1. 20/2187
2. 40/2187
3. 40/729
4. 20/729
5. None of the above

**Solution: 2)**

The paper of each student can go to any of the nine professors.

As there are 5 students, there are  $9 \times 9 \times 9 \times 9 \times 9 = 9^5$  ways in which the papers can be checked by the professors.

Now, number of ways of selecting two professors =  $9C_2$

The five papers can be checked by the two professors in 23 ways, but this will contain two ways in which the papers are checked by just one professor.

$\therefore$  The number of ways in which 5 answer sheets are checked by exactly two professors

$$= 9C_2 \times (2^5 - 2)$$

Number of ways in which each paper can be checked by a professor = 2

Number of ways such that 5 papers can be checked by those two professors =  $9C_2 \times (2^5 - 2)$

$$\begin{aligned} \text{Probability} &= \frac{9C_2 \times (2^5 - 2)}{9^5} \\ &= \frac{36 \times (32 - 2)}{59,049} \\ &= \frac{36 \times 30}{59,049} = \frac{1,080}{59,049} = \frac{40}{2,187} \end{aligned}$$

Q: 94. The probability that in a household, LPG will last 60 days or more is 0.8 and that it will last at most 90 days is 0.6. The probability that the LPG will last 60 to 90 days is:

1. 0.40
2. 0.50
3. 0.75
4. 0.80
5. None of the above

Solution: 1)

Probability that LPG will last  $\geq 60$  days = 0.8

$\therefore$  Probability that the LPG will last  $< 60$  days =  $1 - 0.8 = 0.2$

Probability that the LPG will be last  $\leq 90$  days = 0.6

$\therefore$  The probability that the LPG will last  $\geq 60$  days and  $\leq 90$  days will be = (probability that the LPG will last  $\leq 90$  days) - (probability that a LPG will last  $< 60$  days) =  $0.6 - 0.2 = 0.4$

Q: 95. The ratio in which an article costing Rs 76 per unit is mixed with an article costing Rs 42 per unit so that ratio of the mixture costing Rs 60 is:

1. 3:2

4. 4:3
5. 3:5

Solution: 3)

Cheaper article

Rs. 42

Superior article

Rs. 72

$$\left[ \begin{array}{l} 72 - 60 \\ 12 \end{array} : \begin{array}{l} 60 - 42 \\ 18 \end{array} \right]$$

**Q: 96. A and B can do a work in 3 days. B and C can do the same work in 4 days and C and A can do it in 12 days. Find the time taken by them if they all work together.**

1.  $4\frac{1}{2}$  days
2. 3 days
3.  $3\frac{1}{3}$  days
4. 4 days
5. 5 days

**Solution: 2)**

Work done by A and B in one day =  $\frac{1}{3}$ ..... (1)

Work done by B and C in one day =  $\frac{1}{4}$ ..... (2)

Work done by C and A in one day =  $\frac{1}{12}$ ..... (3)

Adding (1), (2) and (3) we get ,

$$(A+B)+(B+C)+(C+A) = \frac{1}{3} + \frac{1}{4} + \frac{1}{12}$$

$$2(A+B+C) = \frac{1}{3} + \frac{1}{4} + \frac{1}{12}$$

$$A+B+C = \frac{1}{2} \times \frac{8}{12} = \frac{1}{3}$$

So, together they all finish the work in 3 days.

**Q: 97. y is 45 % more efficient than x. If y alone can do a work in 20 days, then how long will x alone take to do the same work?**

1. 29 days
2. 30 days
3. 18 days
4. 17 days
5. None of these

**Solution: 1)**

If y is 45% more efficient than x,

If y takes 100 days to do a work, then x takes 145 days to do the same work.

Now if y takes 20 days, then x will take  $\frac{145}{100} \times 20 = 29$  days

**Directions :** A person has 3 sons. He distributed his money among his sons equally. They invested 1,44,000 , 1,52,000 and 1,32,000 Rs. in a business respectively. At the end of 1st quarter they earn a profit of 37450.

They donated 20% of their profit and rest are invested in the business in the ratio of capital at the starting of 2nd quarter. Again at the starting of the 3rd quarter they invested equally amount in the business. At the starting of 4th quarter they invested in the ration of 7:6:8 respectively.

They invested their money for whole year and the profit earned by them is proportional to the investment and the period of investment.

**Q: 98.** If the amount invested by 1st son at the starting of 2nd quarter is equal to amount invested by the 3rd son at the starting of 4th quarter then find total investment invested by all the sons at the starting of 4th quarter.

1. 32700
2. 25850
3. 26460
4. 28900
5. 27150

**Solution: 3)**

$$144000:152000:132000 = 36:38:33$$

$$\text{Donated amount} = 37450 \times 20\% = 7490$$

$$\text{Amount invested by sons at the starting of 2nd quarter} = 37450 - 7490 = 29960$$

$$\begin{aligned} \text{Amount invested by 1st son at the starting of 2nd quarter} \\ = 29960 / 107 \times 36 = 10080 \text{ Rs.} \end{aligned}$$

$$\text{So amount invested by the 3rd son at the starting of 4th quarter} = 10080 \text{ Rs.}$$

$$\text{Total investment invested by all the sons at the starting of 4th quarter} = 10080 / 8 \times 21 = 26460 \text{ Rs.}$$

**Solution: 4)**

$$= 37450 \times 20\% = 7490$$

3. 36: 7
4. 32: 7
5. 31: 9

**Solution: 4)**

Solution: Given:  $\frac{x}{y} = \frac{3}{4}$

$$\therefore \frac{4x+5y}{5x-2y} = \frac{4\left[\frac{x}{y}\right]+5}{5\left[\frac{x}{y}\right]-2} \quad [\text{Dividing Nr \& Dr by } y]$$

$$= \frac{4 \times \frac{3}{4} + 5}{5 \times \frac{3}{4} - 2} = \frac{8 \times 4}{7} = \frac{32}{7}$$
